DETAILED ACTION

1. The following Action is in response to the amendment filed July 24, 2006. Independent claims 1 and 21 have been amended. Claims 8-20 have been withdrawn from consideration. Claims 1-7 and 21-28 are pending in this application.

Response to Arguments

2. Applicant's arguments regarding "each storage management stack level identifies one or more relative extents of storage objects according to a different level of abstraction" of claim 1 and "each plug-in module resolves references to storage objects according to a different level of abstraction" of claim 21 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Allowable Subject Matter

3. Claims 1-7 and 21-28 are allowed over the prior art of record.

4. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 21, the prior art fails to disclose or suggest the claimed provision "each storage management stack level identifies one or more relative extents of storage objects according to a different level of abstraction" of claim 1 and "each plug-in module resolves references to storage objects according to a different level of abstraction" of claim 21 as claimed in conjunction with remaining claims provisions.

5. The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Prior Art Made of Record

7. 1. Forin et al. (US 6,728,963 B1) disclose highly componentized system architecture with a loadable interprocess communication manager.

2. Lyengar (US 6,874,146 B1) discloses metadata driven system for effecting extensible data interchange based on universal modeling language, meta object facility and extensible markup language standards.

3. DeStefano (US 6,874,123 B1) discloses three-dimensional model to facilitate user comprehension and management of information.

4. McDonald (US Pub. 2005/0041459 A1) discloses interface for removable storage devices.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

Point of Contact

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh B. Thai whose telephone number is 571-272-4029. The examiner can normally be reached on 8 AM - 4:30 PM.
